Subject: Microsoft Settlement

I highly object to the settlement. In short, I agree with the article from Infoworld (RUSSELL PAVLICEK: "The Open Source" from InfoWorld.com, Wednesday, January 23, 2002). Require Microsoft to provide hardware and money for software, but DO NOT allow them to provide any Microsoft software or hardware to the schools. They do not need to control yet another market. Have they not done enough harm already? In fact, they continue to do even more harm, seemingly ignoring the DoJ case altogether.
